Communication and suggestions

- The programs are not final. They will be enriched during meetings of the scientific bodies of the university. The final version of the outline will be ready before tabling it at the regional conference of Algerian universities, around the month of March 2020.
- The transversal and discovered units are being prepared.
- There is the problem of budget. We have not received the budget yet. We propose that part of the budget be devoted to the functioning (accessories of the printers, papers ... etc)

Thank you for you attention!
