

CUPAGIS equipment in Tiaret

Hospitality first: tea and fantastic sweets served by the best students.

The weather station is up and running.

There must be something behind these colors that the mathematician-coordinator Tarmo Soomere cannot understand.

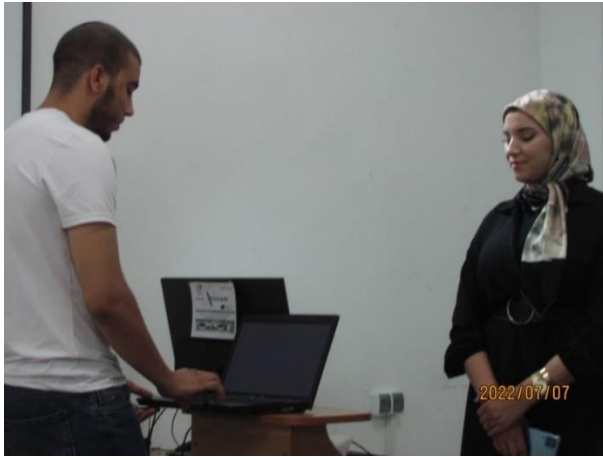

This building hosts the CUPAGIS equipment: PAGIS servers etc., VRC computer class and PASENSO office.

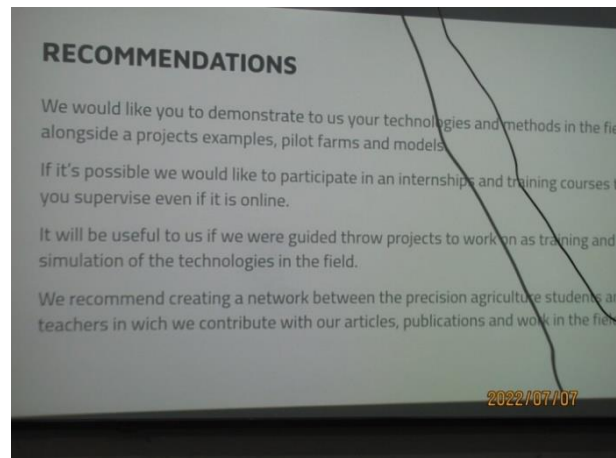

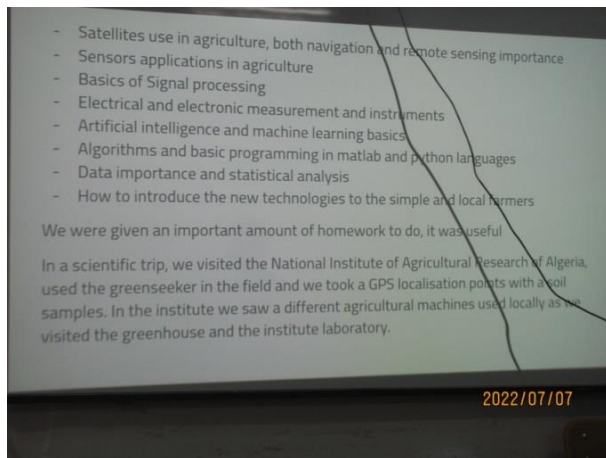

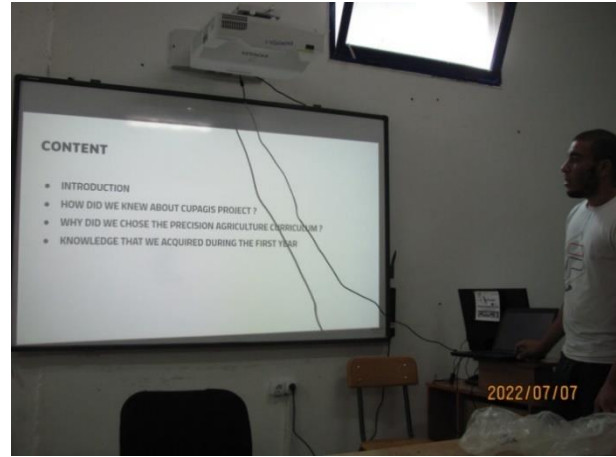

Dr Mohamed Islem Bouacha is here responsible for everything.

Everybody listens to him with great interest and respect.

The magic of the computer system: it works!

Moreover, it displays sensible information and messages to take home.

The academic environment around the campus.

Decided! The final seminar will take place here in September or October.

The venue is on the ground floor of the library building.

The contemporary library has a large share of computers.

Dr Bouacha with sensor equipment for teaching and students who are eager to learn.
