WORK PLAN - Quality Control (WP3)

Leader of WP3 - ECM

Internal evaluation:

This system includes development of templates for reporting implementation of project activities. A report template should be developed every six months by ECM and sent to consortium partners with the indication of deadlines for the completion of reports and presentations.

ECM analyzes them and reports the results of the analysis to the partners. The analysis takes into consideration compliance of the implemented activities of partners with the work plan of the project activities and the LFM.

ECM reports to the project coordinator and local coordinators and together with them develops recommendations for each of the partners.

External evaluation: will be carried out by a selected external expert; the expert will work on sub-contract basis

WORK PLAN - Dissemination & Sustainability (WP4)

- Schedule for publications developed by each partner
 - Activities by PASENSO
 - Involvement of representatives from stakeholders and universities outside the consortium
 - “CUPAGIS Plus” agreement
- Conferences & workshops
 - Project web portal
 - Involving stakeholders
 - Finding and attracting sponsors
 - Commercialization of results

WORK PLAN - Project Management (WP5)

Project Management Board (PMB) – Project Council - will be formed as a strategic decision-making body inclusive one representative from each consortium member who at the same time will operate as local coordinators in their institutions. The local coordinator will lead the special formed Local Project Team (LPT) of his institution.

Coordination meetings: International, regional and local/hosting coordination meetings.

Daily project administration and coordination: project management, administration and coordination will be carried out by the coordinator and project manager (ECM)
